

Word of Mouth™

Two tracks with you, Koroosh: McGill IEEE + optional Altium

Collaborate as **Research Associate, McGill / RI-MUHC** first — then explore **complementary Dianyx** later if fit. Oralable = **outside the mouth on the temporalis** (vitals + bruxing load). IEEE with Ed Owens & Pedro · optional Altium (JAC personal WFH).

IEEE

McGill / RI-MUHC · temporalis
OMG

Altium

Optional · JAC WFH personal

Later

Complementary Dianyx
(optional)

Overnight jaw load needs temple methods — complementary to intraoral PPG

- **Rings / watches** — wrong site for jaw hemodynamics
- **Clinic sEMG** — episodic, not overnight consumer
- **Gap** — continuous at-home **optical + motion** at the temple / temporalis

Oralable = **outside the mouth on the temporalis** (vitals + bruxing load). Start as **McGill** methods/IEEE collaborator; complementary Dianyx later if both sides agree.

Oralable = temple clip + magnetic case + iOS · 50 Hz

NOW (PHASE 0)	NEXT (PHASE 1+)	LATER
Temple HR + SpO₂ · honest device state	IR-DC occlusion · TFI · SASHB	Stage B medical — separate gate

Not sEMG, not a ring, **not inside the mouth** — temporalis / temple. Ship: Gen1
 REV10 · FW **1.0.82** · app **4.3.3** · **Research Kits gated** — target **5 to Pedro by 31 Aug 2026** (ready ≠ delivered).

IP at high level — no claim text

LAYER	STATUS (PITCH-SAFE)
New US provisional	Filed Apr 2026 — muscle activity / Temporalis OMG — patent pending
US utility	Prosecution continued (RCE filed)
EP foundation	EP 4 333 691 B1 granted (JAC)

Embody under **JAC**. Papers list **Research Associate, McGill / RI-MUHC** (+ JAC / Beacon). Phase 2 complementary Dianyx ≠ inventorship transfer. Counsel before deep data share. No provisional PDF in outreach.

Clinical spine: Dr Edward Owens + Dr Pedro Mayoral Sanz

PARTNER	ROLE
Dr Edward Owens	Dental Surgeon · Prosthodontics · Dental Sleep Medicine · leads OAT at Beacon · sleep bruxism · AADSM / ABDSM
Dr Pedro Mayoral Sanz	Dental Sleep Medicine · Beacon Consultants · sleep bruxism + OAT

[Dr Edward Owens](#) · [Dr Pedro](#) — Beacon Consultants Sleep Health Clinic

Backup only: **Dr Asim Roy** (Dianyx Technical Founder · Ohio Sleep Medicine Institute)
— prior co-author; not the primary Oralable clinical story.

Study sizes we already plan

LAYER	DESIGN	PURPOSE
Paper A field	Research Kit · Beacon n≈5 · Arm P + optional Dual A	Usability · wear · descriptive landscape
Phase 0 Day-1	Ed + Pedro · temple vitals on each kit	HR/SpO ₂ · coupling · device state
Core ML Tier 1	20–30 users × 3–5 Protocol A	Leave-user-out · Paper B fuel
Field / concordance	~ 20 devices · n≈20–50+ vs PSG-AV / Bruxoff	Later Paper C / Stage B

Proposed IEEE paper sequence

PAPER	FOCUS	WHEN
A (near)	Research Kit methods — temple PPG-OMG @ 50 Hz · Dual A precursor · Beacon n≈5	Kits ship + ethics
B	Overnight phenotype — TFI / SASHB vs clinical labels	Pedro / Beacon
C (later)	Deeper concordance vs PSG-AV / Bruxoff subset	n≈20-50

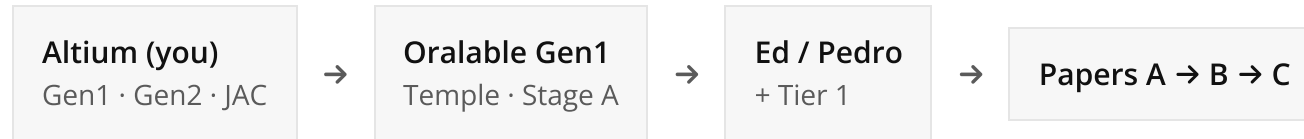

Ask: McGill co-author Paper A · venues (EMBC / Sensors / JBHI). Prior = intraoral PPG; Paper A = **extraoral temporalis OMG** under McGill + JAC.

Altium consultancy — take over from Wout Geeurickx (WeeGee)

	GEN1 (PILOT)	GEN2 (PARALLEL)
BOM / PCB	REV8 / REV10 · ES2832AA2	REV9 / REV11 · ES4L15BA1
Focus	Maintain · ECO hygiene · charge/case nets	Pin/net map · CHRSTS/STAT · RF · cell

Optional personal track. Outgoing: **Wout Geeurickx** (WeeGee). Updated sources still with Wout (John will pull). Rate **to be agreed**. JAC WFH — not a Dianyx hardware deal.

Same Oralable device serves science and product

- You = **Research Associate, McGill / RI-MUHC** · John = former Dianyx CTO, now JAC — Phase 1 McGill; Phase 2 complementary Dianyx optional
- Oralable = **extraoral temporalis** · papers = JAC + McGill / RI-MUHC (+ Beacon)

Word of Mouth™

Ask & next step

- Interest in **Paper A** as **McGill** co-author
- Optional **Altium** personal retainer under JAC
- Venues · availability · contact seyed.nabavi@mcgill.ca

Next: 45-min call — if yes, pull Altium from Wout · reactivate Ed/Pedro Jun agenda
