

Word of Mouth™

Research Kit for Beacon + friends & family

Temple vitals → jaw-load awareness → IEEE feasibility $n \approx 5$ with Pedro, Ed & Koorosh.

JAC Dental Solutions Limited · Stage A wellness wearable · Stage B medical later

Where we are (honest)

ITEM	TRUTH · 12 AUG 2026
Stack	FW 1.0.82 · app 4.3.3 · Gen1 REV10
Engineering	Mac Protocol A + overnight toolchain proven (~6 min eng pack)
Dual A	Mac Oralable + ANR measured (20260812_085110) + research EDF; kits still gated
Kits	Gated (charge-to-temple) — target 5 Research Kits by 31 Aug
Paper A	Research Kit rewrite · n≈5 with Koorosh (McGill)
Cash plan	Point B €180k by Oct 2026 = €50k F&F + €100k PSSF + €30k HPSU

Ready ≠ delivered. Close the charge gate. Then ship the kits.

Problem

- **Rings / watches** — wrong site for jaw load
- **Clinic sEMG** — accurate but episodic
- **HSAT (AcuPebble)** — excellent for AHI; not temple OMG
- **Gap** — continuous optical + motion at the temporalis, nestable with MAD titration

Research Kit solution

Temple MAM clip + magnetic case + ANR M40 sEMG + iOS app

MODE	WHAT YOU GET
Core / Arm P	Temple HR + SpO ₂ · 1–2 h oxygen burden ± MAD (not AHI)
Stretch	≥6 h state hypnogram
Dual A (Mac)	Labeled Oralable ↔ ANR concordance
Landscape	Output classes vs Bruxoff / GrindCare / AcuPebble

Physics: PPG + IR-DC occlusion + jaw ACC — outside the mouth.

Why Beacon / Pedro-Ed

PARTNER	FIT
Pedro	MAD titration · Arm P · AcuPebble AHI nest
Ed	Overnight path · SB / OAT framing · Beacon leadership
Together	n≈5 feasibility · ethics · IEEE clinical authors

Oralable complements AcuPebble — does not replace AHI.

IEEE Paper A + Koorosh

LAYER	PLAN
Paper A	Research Kit methods + Beacon feasibility n≈5
Methods	Koorosh Nabavi — McGill / RI-MUHC
Clinical	Pedro · Ed · Beacon
Device / analysis	John / JAC

Venue shortlist: JBHI / EMBC / Sensors

Competitor map (outputs)

DEVICE	JOB	VS ORALABLE
Bruxoff	Ambulatory EMG (+ECG)	Reference class — not PSG gold
GrindCare	Temporalis sEMG	Peer site; Oralable is optical
AcuPebble	OSA HSAT / AHI	Nest for Arm P — do not clone
ANR M40	Research sEMG	In the kit for Dual A

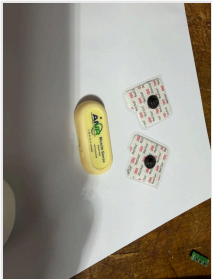

FIG-CO-026 — ANR M40 in kit. Competitor stills (Bruxoff / AcuPebble / GrindCare) remain placeholders FIG-CO-027–029.

IP (pitch-safe · no claim text)

LAYER	STATUS
European foundation	EP 4 333 691 B1 granted (JAC)
US utility	Prosecution continued
New US provisional	Filed 9 Apr 2026 — <i>Apparatus and Method for Muscle Activity Monitoring</i> · 64/033,978 · patent pending

Research Kit + Dual A + Arm P puts Temporalis OMG / IR-DC into practice and evidence. Do not attach provisional PDF or claim text.

The ask — clinical + F&F

- **Clinical:** ethics path · dry-run + Arm P · authorship · Bruxoff access / photos if available
- **F&F:** €50k priced equity within Point B €180k by 31 Oct 2026
- **Point B rest:** EI PSSF CLN €100k + HPSU €30k
- **Valuation / terms:** still open — counsel pack to follow (not invented here)
- **Kits:** 5 Research Kits to Pedro by 31 Aug 2026

Use of funds (F&F slice)

USE	ROLE OF €50K F&F
Kit finish / ship / spares	Charge-to-temple · 5 kits + ANR
Beacon / Paper A ops	Ethics, dry-run, Arm P windows
App / FW soak	Field stability on 1.0.82 / 4.3.3
Bridge to Point B close	Runway to PSSF / HPSU

Indicative F&F slice — not a full Stage A budget. Next: status note + call.
