

Word of Mouth™

Oralable

Temple wearable for overnight vitals → jaw-load awareness → later medical device.

Stage A — now

Patent-implementing wellness wearable

Stage B — later

Medical device pathway (not claimed today)

Point A baseline (Ken, 9 Jun): 1.5 / 5.0 Essential

Keys: ← → · discuss openly — F&F valuation still open

Where we actually are

DIMENSION	JULY 2026
Entity	JAC Dental Solutions Limited (Ireland)
Product	Gen1 Research Kits · Phase 0 temple HR/SpO ₂ · gated · target 5 to Pedro by 31 Aug 2026
Hardware	BOM REV8 · PCB REV10 · ES2832AA2 · FW 1.0.82 · magnetic case (not Qi)
App	Patient app only — Oralable for Dentists off
Claims	Wellness only — not a medical device
Cash (17 Jul)	€1,293 close · ~€63.5k director loans · ~€0 product revenue
Point B ask	€50k F&F + €100k EI PSSF CLN + €30k HPSU = €180k by Oct 2026
Cap table	John ~63% · Conor ~21% · angels ~16%
Sample COGS	Gen2 Kaga €3,735 lot · Bittele ~\$3.46k paid
IP	Provisional 64/033,978 filed · utility 18/289,827 RCE filed · EP/WO grant path

Investors form Point A whether we write it or not. This is the honest version.

Wrong site, episodic tools

Sleep bruxism damages teeth, drives jaw pain, and correlates with overnight oxygen burden.

- **Rings / watches** — general wellness at finger/wrist; wrong site for jaw load
- **Clinic EMG** — accurate but episodic, expensive, not overnight consumer
- **Gap** — no continuous at-home optical + motion record of jaw hemodynamics

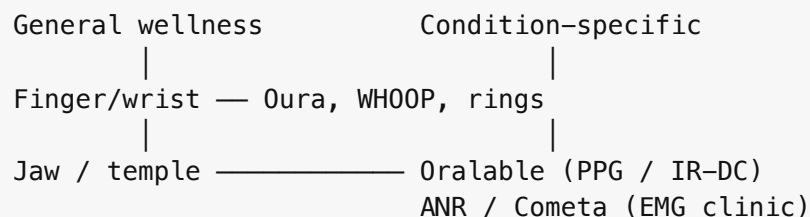

Condition-specific problem — not “another sleep tracker.”

Oralable

Nordic BLE temple clip + magnetic charging case + iOS patient app.

NOW — PHASE 0	NEXT — PHASE 1+	LATER — STAGE B
Temple HR + SpO ₂ · honest device state · Gen1 pilot evidence	IR-DC · TFI · SASHB in patient app · patent embodiment	Cleared / CE medical device · locked IFU / QMS
Physics: PPG + IR-DC hemodynamic occlusion + jaw accelerometry — not sEMG, not a ring.		
Phase 0 proves the substrate; Phase 1+ is the invention story on the same Gen1 hardware.		

Why we win

- Orthogonal to rings — same sensor classes, different physics
- Open 50 Hz pipeline (Swift + Python) vs black-box rings
- Patient app first; dentist share after Phase 1+ (not Ed/Pedro)

SAM SKETCH

4.1M

US custom nightguard users

SOM SKETCH

1.4M

× wearable interest

Phase 0 does not claim that SOM. Sell temple vitals reliability first.

Shipping truth

ITEM	SPEC
Clip	Gen1 · REV10 · ES2832AA2 (nRF52832)
Charge	Oralable magnetic case — not phone Qi
Firmware	1.0.82 ship
Placement	Temple · manual modes (chrsts auto not validated)
App	Oralable patient · TestFlight vitals
Out of scope	Dentists app · Protocol B · medical claims

Pilot: Ed & Pedro — patient app only · temple sessions · CSV evidence → unlock Phase 1+.

Stage A → Stage B

Stage B – Medical device (H2 2027–2028+)
 ▲ evidence + locked claims + QMS
 Stage A – Wellness wearable (ship first)
 ▲ patent–implementing product
 IP (provisional + utility + EP/WO)
 ▲
 Phase 1+ → Phase 0 Ed/Pedro → Gen1 → Gen2

STAGE	CLASS	MONEY
A	Wellness wearable	Hardware + consumer IAP
B	Medical (later)	Higher ASP · regulatory gate

No FDA/CE claims in App Store, website, or Ed/Pedro materials during Stage A.

Portfolio — filed & live

TRACK	STATUS
EP / WO foundation	WO2022234145 · EP 22728460.1 · grant formalities
US utility 18/289,827	Filed RCE + After Final response 12 Jun 2026
US provisional 64/033,978	Filed 9 Apr 2026 — Apparatus and Method for Muscle Activity Monitoring
Case / enclosure	Assignment to JAC in process
Embodiment	Phase 0 temple → Phase 1+ IR-DC / TFI / SASHB

Still open: assign provisional → JAC · EP register Byteexplain→JAC · FTO memo

Counsel: Peacock (US) · PurdyLucey (EU). No claim text on public site.

Two paths

A — Consumer

App Store + web hardware · Ed/Pedro in scope

B — Professional

Dentist app + share · deferred until Phase 1+

PRODUCT	PRICE (EUR)
Premium	€9.99/mo · €99.99/yr
Dentist Professional	€29.99/mo
Dentist Practice	€99.99/mo

Geography: Ireland / UK first → EU → US. Year-1 draft targets unproven. CAC still a gap.

Honest status

EVIDENCE	STATUS
Gen1 kits + FW 1.0.82	Ready
Ed/Pedro protocol + quick start	Ready — execution in progress
Prior lab / temporalis runs	Partial
App Store MAU / MRR	Gap
Dentist paid seats	N/A until Path B
Pilot pass-rate for investors	Pending Ed/Pedro

First customer-validation evidence Ken asked for = complete Ed/Pedro gates.

Stack

LAYER	STACK
Firmware	Zephyr / nRF · TGM GATT · MCUboot OTA
Sensors	MAXM86161 PPG · LIS2DTW12 ACC · 50 Hz
Apps	iOS patient + dentist (gated)
Shared	OralableCore — BLE, algorithms, CloudKit
Science	Python gold standard · clinical protocols
Gen2	nRF54L15 · BOM REV9 / REV11 · ~30–35 mAh path

Open phone-side pipeline — strength for IP embodiment and Stage B evidence.

Planning envelopes

WINDOW	FOCUS	MID CASH
Now – Sep 2026	Phase 0 Ed/Pedro	~€30–50k
Q4'26 – Q1'27	Phase 1+ embodiment	Toward Stage A ~€200–250k
2026–2027	Gen2 bring-up	Stage A+Gen2 ~€350–450k
H2'27 – 2028	Stage B exploration	Through Stage B ~€0.8–1.0M

Ken Point B raise (€180k by Oct) bridges near-term cash — distinct from full Stage A eng envelope.

What can actually bill

Hardware (clip + case) → now / pilot
Consumer Premium IAP → after credible Phase 0–1+ dashboard
Dentist Practice IAP → after Phase 1+ share + CloudKit
Cleared device (Stage B) → 18–36+ months after wearable proof

Risk if we sell too early: marketing “bruxism” while shipping temple SpO₂ only.

Point B: €180k by 31 Oct 2026

CASH NOW	DIRECTOR LOANS YTD	POINT B TARGET
€1.3k 17 Jul closing	€63.5k founder-funded	€180k by Oct 2026
WORKSTREAM	AMOUNT	INSTRUMENT
Friends & Family	€50k	Priced equity
EI PSSF	€100k	Convertible loan note
EI HPSU Feasibility	€30k	Non-dilutive grant

Ready to discuss

- Ask structure
- Cap table (~63/21/16)
- Cash + sample COGS
- Product / IP / Stage A→B

Decide next

- F&F pre-money valuation + terms
- Use of funds (€50k / €180k)
- 12-month runway monthlies
- PSSF CLN terms · Voice session

Point A is real. Point B needs capital.

Working Gen1 temple wearable in pilot · wellness-only · patent path filed · cash thin and founder-loan funded.

Soft-launch Stage A embodiment → Gen2 → Stage B medical when evidence allows.

We are not claiming to be a medical device today.
We are building the wearable that makes that path real.
